Experience

Jan 2017 – Present

Software Engineer Intern, *Ultimate Software*, Weston, FL.
Internal Tools & Payroll
- Developed an internal tool for our new product team to help interact with our *CQRS* and *event-sourced* ecosystem of microservices, reducing QA and demo time of back-end features by 50%.
- Rewrote a legacy internal tool as a small suite of *Spring* microservices to help company-wide teams automate and manage their regression testing, saving tons of manual QA time and data entry.
- Strengthened and provisioned the functional test architecture of our Tax Management team by automating their tests to continuously run on their CI to weed out any potential flakiness.

May 2016 – Aug 2016

Software Engineer Intern, *Best Buy*, Richfield, MN.
User Generated Content
- Automated ingestion of an external NLP API on customer review content via *Spring* batch jobs.
- Delivered the ingested data to internal teams by republishing it to an internal and scalable API.
- Researched NLP techniques to potentially perform feature extraction and sentiment analysis in-house.
